City of Madison Comprehensive Plan

Data Source: City of Madison DPCEd, Planning Division

Comprehensive Plan Future Land Use Map Notes

#	Note	#	Note
1	There are significant natural glacial features along this corridor which should be preserved and incorporated into an Ice Age National Scenic Trail connection between University Ridge Golf Course and Wild Town Road at Study Oak Lane.	9	The existing office and residential uses are recommended to continue until a future opportunity arises to convert this area to public park and open space use. The existing uses should not be expanded and the land should not be redeveloped.
2	While this parcel would ideally be retained as open space and/or farmland as part of a community separation area between Verona and Madison, it may be developed as an employment use.	10	This former sanitarium site is presently owned by Dane County and used as an office building. Adaptive reuse of the existing buildings for employment, residential, or mixed uses is recommended if this site is redeveloped. The open area south of the buildings should remain undeveloped and any reuse of the site should be designed to preserve and enhance the views from the site to Lake Mendota and the hilltop. The wooded portion of the site north of the buildings should be maintained as open space.
3	West Towne Mall, the Odana Road corridor, and Westgate Mall are shown as future mixed use areas. However, redevelopment that includes substantial residential components within the area that is generally bounded by Whitney Way (west), Mineral Point Road (north), High Point Road (west) and Schroeder Road (south) should be preceded by adoption of a detailed City plan. Such a plan should address connectivity improvements, more parks and open space, and other amenities and infrastructure necessary to support residential development.	11	It is recommended that there be no additional development on the top portion of this hill. Future development may be allowed around the lower portions of this hill only if such development is done with sensitivity to the topography in a manner that preserves open space and views to the hill from surrounding properties and provides adequate vegetative buffers from the existing park property.
4	The "house-like" residential character of this LMI area should be retained, and any limited development should generally maintain the current single-family/Two-Family development rhythm.	12	The City may consider buildings taller than four stories in this contiguous NMU area for large parking lots/water areas.
5	The University of Wisconsin-Madison Campus Master Plan provides detailed land use and development recommendations for the UW-Madison. That document was approved by the City in 2017 as part of the requirements for the UW-Madison's Campus Institutional Zoning. All UW-Madison development within the campus boundary must be consistent with the Campus Master Plan unless an exception or alteration is approved by the City, consistent with applicable regulations, procedures, and standards. The Comprehensive Plan's designation for the UW-Madison campus is primarily to address the UW's use of property. However, there are some privately owned properties within the SI designated areas. If such privately owned parcels redevelop, their use and design should be consistent with adopted sub-area plans, the most relevant of which, as of the adoption of this Plan, is the Regent Street-South Campus Neighborhood Plan. In the rare case where private redevelopment is proposed for an area that is not covered by a sub-area plan, multifamily residential and mixed use development shall be considered appropriate, so long as the scale, massing, and design of the building fits in with the surrounding context, as determined by the Plan Commission and City Council.	13	It is not recommended that the middle home park that currently occupies this area cease operations, but employment is the most appropriate future use of the property if the property owner does close the park.
6	This property is currently the site of the State of Wisconsin Menomota Mental Health Institute. A detailed development plan for the property should be prepared and adopted by the City prior to any redevelopment to new uses. Land along Lake Mendota is recommended for public park and open space.	14	Land in this area is part of the Town of Blooming Grove and will be attached to the City before November 1, 2027. This land should either continue in its current agricultural use or be incorporated into the adjacent Capital Springs State Recreation Area.
7	Refer to the Downtown Plan for the area bounded by the lakes, Blair Street, Regent/Prospect Streets, and Park Street for envisioned preservation, mix of land uses, building design standards (including heights and setbacks/setbacks), streetscape design, and other land use and design elements. Note that residential uses shown in this area should be considered "primarily residential," as defined in the Downtown Plan.	15	The City should work with the Town of Blooming Grove, as outlined in the 2005 intergovernmental agreement, to prepare a special area plan for land generally bounded by Milwaukee Street, Starkweather Creek, the railroad tracks/Highway 30, and Regent Road extended, prior to any development within the area.
8	The Alliant Energy Center is shown as SI, but may include restaurant, entertainment, and hotel uses if a Master Plan for the area that includes those uses is adopted by the City. Such a Plan may include land use changes to surrounding properties, such as the Employment designated properties to the north.	16	Areas to the east and west of Eastpark Boulevard in this location may be appropriate for Community Mixed Use development if additional connectivity in the street network is provided to break up the large blocks and sufficient accessible parkland is dedicated for residential dwelling units.
		17	A portion of this area may have the potential for limited development as a conservation subdivision.
		18	The majority of this site is undeveloped - a detailed plan for any change in the site's current use should be approved by the City prior to consideration of any rezoning request.
		19	If restoring the high ground east of Underdahl Road to open space is not feasible this area should transition to residential development.
		20	An Interstate interchange in this general location would help implement higher intensity employment and mixed use land uses planned for this area.
		21	Portions of this area should be considered for permanent open space and agricultural land preservation as part of a community separation agreement with the Village of Cottage Grove and Town of Cottage Grove.
